

6-day Educator Training Workshop

at the Bermuda Institute of Ocean Sciences

June 23-28, 2014

- Middle & High School teachers, curriculum specialists, administrators and informal educators.
- Successful completion of this intensive workshop will empower the participants to plan and execute future educational field study courses for their students at BIOS.

Themes for potential study include:

- Oceanography and Marine Science: including lab and STEM activities.
- Island Ecology and Geology : Nonsuch Island conservation of rare and threatened species and habitats, including the Cahow.
- Bermuda and U.S. History: Colonization, Revolutionary War, War of 1812, Civil War.
- Scientific Exploration Past and Present: William Beebe, global climate initiative and AUV gliders.
