Lesley University has launched a [Makerspace in their Graduate School of Education](#) to provide a new way for their students and community partners to engage in learning and inquiry-based exploration. Embracing the “maker” way of knowing, this is a place for the community to play, tinker, design, and create. Hear how Sue Cusack and Valerie Shinas collaborated on the development of this learning space. After the keynote, attendees will be able to explore and tinker in the Lesley Makerspace.
